PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

PATENT NO.: 7,049,910

PATENTEE: CAMPOLO ET AL

ISSUED: MAY 23, 2006

SERIAL NO.: 09/812,288

FILED: MARCH 20, 2001

TITLE: CIRCUIT INTERRUPTING DEVICE WITH RESET LOCKOUT AND REVERSE WIRING PROTECTION AND METHOD OF MANUFACTURE

REQUEST FOR CERTIFICATE OF CORRECTION
UNDER 37 C.F.R. §1.322

Attn: Certificate of Corrections Branch

Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

Certificate
JUL 16 2007
of Correction

Dear Sir:

In accordance with the provisions of 37 C.F.R. §1.322 of the Rules of Practice, which implement 35 U.S.C. 254, approval of the attached Certificate of Correction for the above-identified patent to correct the error noted below appearing in the issued patent is respectfully requested.

Most recently, in reviewing the above-identified patent, it was discovered that a typographical error appeared in Claim 6, which should be corrected.

In particular, in Column 18, line 19 (line 7 of Claim 6), after the word "a" please change "ripped" to correctly read: --tripped--.

Since the error was the fault of the PTO, as is shown by the attached excerpt from the amendment filed September 30, 2005, no fee is required for the filing of this Certificate of Correction. However, should any additional fees be required, the Commissioner is authorized to charge such fees to Deposit Account No. 03-2468.

Accordingly, approval of the attached Certificate of Correction is respectfully requested.

Respectfully submitted,
STEVE CAMPOLO ET AL

Enclosures: Certificate of Correction in duplicate
Excerpt from the amendment dated 9/30/05.

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: MAIL STOP Petition Certificate of Corrections, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450 on July 10, 2007.

Kelly Esposito

Serial No. 09/812,288
0267-001-1415CTP9
Filed 03/20/2001

7. (Previously added) The method of claim 3, wherein said reset lockout portion is adapted to be selectively electrically powered by the phase conductive path.

8. (Cancelled)

9. (Previously added) The method of claim 3, wherein said circuit interrupting device further comprises a mechanically operated mechanism for tripping said circuit interrupting device.

10-16. (Cancelled)

17. (Previously added) A method of distributing an electrical wiring device capable of being installed in cooperation with a current carrying electrical circuit, said electrical wiring device including a reset lockout capability having a circuit interrupting portion disposed within a housing, said method comprising the steps of:

receiving said electrical wiring device in a tripped state, said circuit interrupting portion including within the housing a phase conductive path and a neutral conductive path between a line side and a load side, said phase conductive path including a portion thereof terminating at a first electrical conducting connector which is capable of being in electrical communication with a source of electricity, a second electrical conducting connector capable of being in electrical communication with at least one load, and a third electrical conducting connector capable of being in electrical communication with at least one user accessible load, said neutral conductive path including a portion thereof terminating at a fourth electrical conducting connector capable of being in electrical communication with a source of electricity, a fifth electrical conducting connector capable of being in neutral electrical communication with said load, and a sixth electrical conducting connector capable of being in neutral electrical communication with said user accessible load,

said circuit interrupting portion being capable of causing electrical discontinuity in said phase and neutral conductive paths intermediate said line and load sides upon the occurrence of a predetermined condition,
